The Formentera Council mobility department reports that from today (31 May), motorists who have visited formentera.eco to seek authorisation to enter, drive and park on the island in July and August will begin receiving confirmation if their reservations are accepted.

Since its 15 April launch, the formentera.eco reservations portal has received 3,796 requests—1,936 by tourists, 823 by Formentera locals and 204 by residents of Eivissa.

Payment
Next week will come with the rollout of a payment portal where visitors from outside the Balearics who are subject to a daily fee of one euro to use their cars (or €0.50/day for scooters) can complete the process in a single step. The site can be accessed and credit card payment processed as soon as a petition has been made specifying the days one plans to visit.

Formentera residents are exempt from the fee, as are Eivissa residents and motorists in the rest of the Balearics. Authorisation will be automatic and the online application unnecessary for vehicles belonging to Formentera residents which have already been cleared for blue zone parking.

Rental cars
From next week car hire companies on the island will be notified by phone with the user name and password required for registration. Businesses must visit formentera.eco and click on the *e mpreses de lloguer*
(car hire companies) section in the
condicions especials
(special conditions) part of the website. A plate number will be required to finalise the permit to operate a vehicle on local roads in July and August.

Acting mobility councillor Rafael González held up 2019 as year zero of the pathbreaking anti-congestion and conservation-forward programme in Spain. “It's also about giving tourists what they want: a calm, tranquil island where they can enjoy their holidays”.
