The information technologies arm of the Formentera Council has announced that from today, Monday January 16, e-certificates from the Royal Mint of Spain can be processed through the Citizen's Information Office (OAC). Although formerly processed at the Formentera branch of the Regional tax agency, Agència Tributària de les Illes Balears, local service was suspended in January 2015 and since then islanders have been forced to travel to Eivissa to process such requests. That drove the Council's decision to accredit both OAC and the civil registry to grant e-certificates locally.
