The Formentera Council's environment department is backing "*Plàstics Fora*" (No More Plastics), an educational programme that is piloted by the non-profit group Cleanwave and aimed at reducing people's consumption of single-use plastics.

Pupils in Sant Francesc and Sant Ferran took park in a series of eight workshops for children thanks to a €2,125 grant from the Council. Three privately-funded workshops were held in la Mola last November.

Workshop participants screen a video explaining the global problem of plastic and sit for a storytelling session exploring the subject. Children take a version of the story home with them to discuss the issue in family.
