Today, on International Day of Environmental Education, the Office of Environment of the Consell de Formentera and IES Marc Ferrer have organised a series of visits to the waste treatment plant of Es Cap de Barbaria and the island's waste collection point (*Deixalleria*). Today's visit was made by secondary pupils in years one and two. Over four days various groups of pupils will visit the plant to learn about the island's waste circuit, from the moment objects land in the bin to how they are collected, compacted, sorted at the Deixalleria and shipped to sorting plants off the island for treatment, or to Eivissa's Ca Na Putxa landfill.
