

The Office of Sport of the Formentera Council has announced the Antoni Blanc sports centre will once again open its doors to islanders September 12. Operations at the centre will cease for the first two weeks of the month to allow for maintenance. CiF sports councillor Jordi Vidal reported crews would clean the building's façade, disinfect changing rooms, the swimming pool and other areas and regulate chlorine in water at the centre.

Maintenance workers will also conduct a revision and inventory of lockers and other material at the centre. They will take time to refit old tiles and repaint part of the building's interior. The work will be done by Council staff and outside contractors. "These are things that can only be done when the fitness centre is empty," said Vidal, who underscored the importance of such regular upkeep both for maintenance and hygiene reasons while apologising for the inconvenience it might cause.

The Antoni Blanc centre will re-open for sports centre and pool activities next Monday.
