

Islanders receiving support at the Formentera Day Centre (*Centre de Dia de Formentera*) who took part in yearly summer activities at the sailing school concluded the season last month by practising a new activity: kayaking. In this way, windy days found participants enjoying activities on the accessible sail boat while on days with less wind, they kayaked. The result, according to the Formentera Office of Sports, was excellent, with participants succeeding in performing activities autonomously and without outside help.
