

At a morning meeting of the Formentera Council (CiF) Junta de Portaveus, a group comprising one spokesperson from each political party with representation in the Council as well as CiF president Jaume Ferrer, members discussed the progress of priority projects set out in a special CiF document. The document, ratified at a Junta meeting in August 2015 and later in a plenary session of the CiF, sets out a list of different projects requiring action from the Govern Balear.

In President Ferrer's words, the consensus-backed document gives credibility to the requests made by the CiF to the regional government in Palma. Ferrer added the Council's requests were «long-standing» and said the unanimity of the accord gives the local administration strength in its argument.

The meeting was a chance for members to speak about progress in the Formentera Council's relationship with the Palma government. As Ferrer pointed out, each of the 14 projects have been brought before the Govern (to the president or different regional ministers) because «they are either the direct responsibility of the Govern or require its intervention».

Ferrer highlighted the Junta's unanimous decision to move forward with the different legislative projects and convene future meetings every six months or whenever there are important developments on an issue. In this way, he said, the Junta is sure to represent the support of the different groups with plenary representation. CiF president Ferrer thanked the different party spokespeople for their support of the document.
