

Next Thursday, 22 May, will mark the start of the period to request approval for tourist-use accommodation in single-family homes. As of today's date, no end-date for registration has been set.

Pre-registration must be completed at the **Citizens' Information Office (OAC)**, and starting Thursday that same office will have all pertinent information available to the public.

The goal behind the move to register tourist-use dwellings is to ensure that even non-hotel accommodation on Formentera be held to certain quality standards. If everyone takes part, visitors are more likely to come away with positive memories of the island, a key factor to our continued economic growth.
