

Language policy councillor Raquel Guasch met at the head offices of the Consell de Formentera with Beatriu Defior and Agustina Vilaret, the director general of language policies and the general secretary of universities, research and language policies for the Balearic Islands, to discuss language initiatives by both administrations.

At the close of the meeting, Guasch highlighted the importance of cooperation and coordination in achieving real change on language policies. Councillor Guasch also underscored other priorities—“to recuperate the self-study corner that’s been shuttered for years, and enhance the role of the Catalan language in restaurants and other local businesses”.

The language policies section of the Balearic government made assurances, moreover, that efforts are under way to implement “language reinvigorators” across the Balearics.
