

CiF chair Jaume Ferrer sat down with Espai Dones president Dolores Fernández to sign a partnership agreement between the two entities to sponsor initiatives promoting equality and gender violence prevention in 2019.

With a €3,000 grant from the Council the local chapter of Espai Dones will stimulate engagement and organise programming that pushes issues like gender equality and gender violence prevention into the public consciousness. To get there, the association pledges to host education and public awareness activities around equality and women's rights.
