

The office of the environment of the Formentera Council is currently overseeing comprehensive cleaning operations in Sant Francesc. The work is designed to spruce up pavements and street-level planters that have been left sullied in the wake of the summer tourist season.

Specifically, city workers will remove old gum and waste from pavements and streets, add earth and fertiliser to planters, clear out street-side gutters and reposition out of place wastebins.

Similar operations have been implemented over recent months in Es Caló and Es Pujols, and are envisioned for Sant Ferran, La Mola and La Savina before the start of the 2015 summer season.
